

Coverage audit (V2, adversarial)

European Master's & Scholarship Research · Tunisian applicant, 180-ECTS Licence in Business Intelligence · compiled 2026-08-16 · 181 programmes, 103 funding schemes

Date: 2026-08-16 · **Baseline audited:** `output/programmes_master.csv` , 168 rows **Scope:** the six zero-coverage countries, Greece, Bulgaria, Track B in the four strongest Track B territories, and the private business-school sector. **Firecrawl usage: 14 calls of the 90 allowed.** Everything else was WebSearch/WebFetch.

Nothing below is in `programmes_master.csv` — each candidate was checked against the institution+programme list before being written up.

1. GENUINE MISSES

GREECE — the largest single gap in the dataset

Greece held 2 rows. Five programmes below are qualifying and absent. G5's estimate of "4–8 additional rows" was accurate.

A1. International Hellenic University — MSc in e-Business and Digital Marketing

Field	Value
track	A
country / city	Greece / Themi, Thessaloniki
institution	International Hellenic University (School of Science & Technology, UCIPS)
institution_type	public
programme_name_exact	MSc in e-Business and Digital Marketing
degree_awarded	MSc — Greek state postgraduate degree, certified by the Hellenic Authority for Higher Education (HAHE/ETHAAE) , published in the Government Gazette
language	EN ("taught exclusively in English")
duration_months	18 full-time (30 part-time)
ects	90
tuition_non_eu_per_year	€3,700 total (no EU/non-EU differential published)
app_deadline_non_eu	2026-08-26 (2026/27 cycle — PRIOR_CYCLE relative to a 2027 intake)

Field	Value
min_prior_ects	NOT_FOUND — stated as "an undergraduate University degree in Engineering, Science, Informatics, Economics & Business Administration"
english_req	State Certificate B2 or equivalent (waived for English-medium degree holders)
programme_url	https://st.ihu.gr/studies/postgraduate/ebusiness
confidence	high

Squarely Track A (digital business + marketing analytics + "skills related to data analysis and evaluation"). **Caveat to record in fit_notes** : study mode is "Hybrid: In-person/Remote", weekday evenings — this collides with the MESRS in-person-examination criterion (arrêté art. 2) that F3 identified.

A2. International Hellenic University — MSc in Data Science

Same institution, school, fee (**€3,700 total**), ECTS (**90**), duration (18 months), language (EN), HAHE certification and deadline (2026-08-26). URL: <https://st.ihu.gr/studies/postgraduate/datascience> Entry: "undergraduate degree... preferably STEM; other degrees considered with solid background in statistics/mathematics and good knowledge of databases and programming" — a Business Intelligence licence plausibly clears this.

Boundary flag, not a recommendation: this sits in a Science & Technology school with no explicit business-analytics stream, so under a strict reading of the Track A definition it is excludable. But the dataset already contains Utrecht *MSc Applied Data Science*, Tilburg *MSc Data Science and Society* and HSLU *MSc Applied Data Science and AI* on the same footing. **Either A2 goes in or those three come out** — the current dataset is internally inconsistent on this boundary. Same hybrid-delivery caveat as A1.

A3. Athens University of Economics and Business — MSc in Marketing Analytics

Field	Value
track	A
country / city	Greece / Athens
institution	Athens University of Economics and Business (Dept. of Marketing and Communication)
institution_type	public
programme_name_exact	MSc in Marketing Analytics
language	EN (AUEB's own programme list: "Greek and/or english"; the tuition page and admission rules are published in English and require an English certificate)
duration_months	15 full-time, incl. a 3-month Analytics Capstone Project
ects	75
tuition_non_eu_per_year	€4,800 total , full-time (part-time €5,800); no non-EU differential published; figures shown for September 2026 entry

Field	Value
tuition_source_url	https://www.dept.aueb.gr/en/marketinganalytics/content/tuition-fees
english_req	C2 for the full-time programme (C1 for part-time) — an unusually high bar, record it
work_experience_required	no for full-time; yes, 2 years, for part-time
programme_url	https://www.dept.aueb.gr/en/marketinganalytics
confidence	medium (language field is stated as "Greek and/or english" on AUEB's central list — worth one confirming email before the row is treated as settled)

This is an exact-title Track A match at a public university already represented in the dataset by a *different* AUEB programme. Its absence is a straightforward miss.

A4. Athens University of Economics and Business — MSc in AI and Data Science

English, full-time and part-time, **€6,000 total**, offered jointly by the Departments of Informatics and Statistics. €3,000 of assistantships available to full-time students, reducing the effective fee to €3,000. URL: <https://datascience.aueb.gr/> · <https://www.dept.aueb.gr/en/cs/content/graduate-study-program-master-science-data-science> Same boundary flag as A2 — Informatics/Statistics faculty, no business stream.

B1. Aristotle University of Thessaloniki — MSc in Digital Media - Computational Intelligence

Field	Value
track	B
country / city	Greece / Thessaloniki
institution	Aristotle University of Thessaloniki, School of Informatics
institution_type	public
programme_name_exact	Digital Media - Computational Intelligence
language	EN ("Courses are taught in English, and foreign students are welcome")
duration_months	18 (3 semesters)
ects	90
tuition_non_eu_per_year	€1,800 for the whole programme — the cheapest qualifying Track B programme found anywhere in this audit
mode	In-person (ministry register records mode as in-person — materially better than the IHU hybrid programmes for MESRS purposes)
quantitative_prereqs	"a degree in computer science or electrical and computer engineering or a numerate physical science discipline" — this is a real risk for a Business Intelligence licence and must be checked before applying

Field	Value
programme_url	https://dmci-en.csd.auth.gr/ · ministry record: https://studies.minedu.gov.gr/program/?programme_id=1191
confidence	high

Directly comparable to Bauhaus-Weimar *Computer Science for Digital Media*, which the dataset already carries as Track B. AUTH is already in the dataset for a different programme, so this is a programme-level miss, not an institution-level one.

NETHERLANDS

B2. Leiden University — MSc Creative Intelligence & Technology (*resolves followup #5*)

The old **MSc Media Technology has been renamed, not abolished**. It is the same programme, same faculty, same programme code.

Field	Value
track	B
institution	Leiden University, Faculty of Science
programme_name_exact	Creative Intelligence & Technology (previously Media Technology)
degree_awarded	Master of Science · programme code 60206
language	EN · duration 24 months · 120 ECTS · full-time · starts September and February
tuition_non_eu_per_year	€22,500 institutional fee, 2026-2027 (€17,200 for a second master's; €2,694 statutory for EU/EEA)
tuition_source_url	https://www.universiteitleiden.nl/en/education/study-programmes/master/creative-intelligence--technology/admission-and-application/tuition-fees
app_deadline_non_eu	1 April (non-EEA, for the following September)
accepts_3yr_bachelor	conditional — the programme markets itself as "open to any field of previous Bachelor education"; the ECTS floor is not published
programme_url	https://www.universiteitleiden.nl/en/education/study-programmes/master/creative-intelligence--technology
confidence	high on structure and fee; medium on the 180-ECTS question

A5. TIAS School for Business and Society — Full-time MScBA, Business Analytics track

Field	Value
track	A · institution_type private (Tilburg/TU-Eindhoven-affiliated)
programme_name_exact	Full-time Master in Management/Business Administration (MScBA) — Business Analytics Track
degree_awarded	MSc — NVAO-accredited (stated on the programme page)
language	EN · duration 12 months · ects NOT_FOUND
tuition_non_eu_per_year	€28,500 for the whole programme (VAT-exempt; includes the Brussels learning experience)
programme_url	https://www.tias.edu/en/courses/full-time-master-in-managementbusiness-administration-mscba-13453
confidence	medium — ECTS and the non-EU deadline are not published

A one-year 12-month master is squarely in F3's 51-row MESRS risk band. Flag on the row.

GERMANY

A6. EBS Universität für Wirtschaft und Recht — Master in Business Analytics & AI

Field	Value
track	A · institution_type private, state-recognised (institutional accreditation by the German <i>Wissenschaftsrat</i> / Council of Science and Humanities; AACSB)
city	Oestrich-Winkel / Wiesbaden
programme_name_exact	Master in Business Analytics & AI
degree_awarded	Master of Science
language	EN
ects / duration	120 ECTS / 4 semesters (Semester Abroad or Practice track). An Accelerated track of 60 ECTS / 2 semesters exists but requires 240 ECTS or equivalent professional experience — closed to this applicant
tuition_non_eu_per_year	€33,780 total for the 4-semester track (€27,830 for the accelerated track); no EU/non-EU differential published. –€3,000 early-enrolment bonus if enrolled by 28 February
min_prior_ects	180 — "Bachelor's degree with minimum 180 ECTS in any field". This is one of the few German programmes that says so explicitly
other_tests	GMAT / GRE / BAT / EBSgrad / CAT required

Field	Value
english_req	TOEFL iBT 95 or IELTS 7.0
app_deadline_non_eu	no formal deadline; visa applicants advised to apply by 30 May for an autumn start
programme_url	https://www.ebs.edu/en/ebs-business-school/study-programmes/master-in-business-analytics
confidence	high

Note for the report: WHU's Master in Business Analytics is **being phased out and is closed to new applicants from 2026** — correctly absent, and worth stating so nobody re-adds it.

B3. SRH University (SRH Berlin University of Applied Sciences) — M.A. Film, Television and Digital Narratives

Field	Value
track	B · institution_type private, state-recognised (accredited by the German Council of Science and Humanities)
city	Berlin
degree_awarded	Master of Arts · language EN · duration 4 semesters
tuition_non_eu_per_year	€5,950 per semester for non-EU applicants (€4,980/semester EU/EEA/CH) per DAAD's official International Programmes record = €11,900/yr non-EU . SRH's own marketing quotes €22,800 total / €5,700 per semester — a live fact conflict; the non-EU figure must be confirmed with the school
portfolio_required	yes — five to eight pieces of film work (films, screenplays, exposés or film analyses) plus a list of five favourite films/series
english_req	B2
app_deadline_non_eu	none published; rolling
programme_url	https://www2.daad.de/deutschland/studienangebote/international-programmes/en/detail/7011/
confidence	medium (fee conflict)

Materially relevant to this applicant: unlike almost every Track B programme in the "entry-qualification wall" list in `followups.md`, SRH asks for a **portfolio**, not a prior degree in the field. That makes it one of the very few Track B routes actually open to a Business Intelligence graduate with a videography practice.

SWITZERLAND — resolves followup #4 (ZHdK)

B4. Zürcher Hochschule der Künste — MA Design, Major Interaction Design

Field	Value
track	B · institution_type public (HES/Fachhochschule) · city Zurich
programme_name_exact	MA Design, Interaction Design (Major within the Master's programme in Design)
degree_awarded	Master of Arts in Design
language	English — "Main teaching language: English" ← this is the answer followup #4 asked for
ects	120 (Major coursework 90) · duration 4 semesters · autumn start
tuition_non_eu_per_year	CHF 1,220 per semester for non-Swiss = CHF 2,440/yr (CHF 720/semester Swiss)
app_deadline_non_eu	27 February 2026 (2026 entry — expect late February 2027 for the target cycle)
programme_url	https://www.zhdk.ch/en/degree-programmes/design/ma-design-interaction-design
confidence	high

Partial resolution only. ZHdK's MA Design has six majors; only Interaction Design was confirmed English (Knowledge Visualization's language field renders empty even to Firecrawl). The six **MA Film** majors — Cinematography, Creative Producing, Documentary Filmmaking, Directing Fiction, Film Editing, Screenwriting — publish their programme copy in German and should be treated as German-taught until an admissions reply says otherwise. Do not add them.

MOLDOVA — the only qualifying programme found in the six zero-coverage countries

A7. Technical University of Moldova — Master's degree, Data Science

Field	Value
track	A (boundary — technical university, see note) · institution_type public · city Chişinău
language	EN (listed under "STUDY-PROGRAMMES IN ENGLISH")
ects / duration	120 ECTS / 2 years
tuition_non_eu_per_year	€3,000 per academic year , stated for 2026-2027 — i.e. the correct cycle, not a prior-cycle figure. Admission fee €100. Excludes legalisation, residence permit, medical insurance

Field	Value
tuition_source_url	https://international.utm.md/tuition-fees/
confidence	high on fee/ECTS/language; medium on Track A fit and on ANACEC programme accreditation, which was not opened

Why it matters disproportionately: at €3,000/yr with 120 ECTS over two years it satisfies F3's MESRS five-year/two-year-post-licence reading *and* is among the cheapest qualifying programmes in the whole dataset. UTM's own **Business Analytics** master (120 ECTS) is **Romanian-taught** and correctly fails the language filter. The other UTM English master, Software Engineering, is 90 ECTS / 1.5 years and out of track. The "International MBA Agrobusiness Management" is excluded by the MBA rule.

NORTH MACEDONIA — candidates, with a structural catch

South East European University (Tetovo/Skopje) — private-public, state-established — publishes an explicit English-programme list. Second-cycle programmes offered in English that touch the tracks:

Programme	Faculty	ECTS as listed
Business Analytics	Business and Economics	60 only
Marketing and Innovation Management	Business and Economics	60 only
Business Informatics	Contemporary Sciences and Technologies	60-120
Computer Sciences (Data Science module)	Contemporary Sciences and Technologies	60-120

Source: <https://www.seeu.edu.mk/en/future-students/academics/english-programmes>

SEEU states its second cycle follows "the model 3+2 (four semesters, 120 ECTS)... open to candidates who have obtained an undergraduate diploma equivalent to three years (180 ECTS) or four years (240 ECTS)." **Read together, the 120-ECTS variants of Business Informatics and Computer Sciences/Data Science are open to a 180-ECTS holder; Business Analytics, listed at 60 ECTS only, most likely is not.** That is precisely the inverse of what a title-based search would conclude — the on-title programme is the one that is probably closed.

Not recorded, because tuition could not be obtained. SEEU's Financial Aid page covers first-cycle programmes only and publishes no second-cycle fee. This is a one-email gap, not a research gap: financialaid@seeu.edu.mk.

ALBANIA — one candidate, blocked on accreditation

University of New York Tirana — MSc in Data Science and Business Analytics. 120 ECTS, 2 years, English (B1 floor), Faculty of Engineering and Architecture, Department of Information and Intelligent Systems. Programme fee **€9,000 for the programme** (UNYT's published master fee table). URLs: <https://www.unyt.edu.al/page/pm-data-science-and-business-analytics> · <https://int.unyt.edu.al/tuition-fees/>

Do not record it yet. Two checks failed:

1. **Programme-level accreditation is not evidenced.** UNYT holds 6-year ASCAL institutional accreditation (from December 2020) and the ASCAL register lists programme decisions for *MSc Computer Sciences* (BA Nr. 198, 13.12.2024, valid to 12.12.2029) and *MSc Business Administration* (BA Nr. 200, to 12.12.2028) — but **no decision for Data Science and Business Analytics appears in the register entry**. Under brief rule 5 that is unconfirmed, not confirmed. Register: <https://www.ascal.al/en/hei-list/hei/universiteti-i-new-york-ut-ne-tirane-2>
2. **UK-partner exposure.** UNYT runs master's degrees "in collaboration with the University of Greenwich, UK". The evidence indicates the Greenwich arrangement attaches to the **MSc Computer Science**, not to DSBA — but this was not confirmed from a Greenwich or UNYT partnership document. If DSBA turns out to be Greenwich-validated it is excluded outright by the brief's UK rule.

Given the Cypriot accreditation minefield G5 documented, treating this as "found" would repeat exactly the error the brief warns about.

2. CONFIRMED ABSENCES

2.1 SERBIA — structurally closed to a 180-ECTS holder. This is the audit's most consequential negative.

Serbian *master academic studies* are **one year / 60 ECTS**, sitting on top of a **four-year / 240-ECTS** undergraduate degree. Two independent statements:

- **Singidunum University**, on its own master admissions page: "*The length of Master program is one year and it carries 60 ECTS.*" Its complete English-taught master list is **Business Economics · Business Systems in Tourism and Hospitality · Data Science** — all one-year/60-ECTS. <https://singidunum.ac.rs/admission-master/>
- **University of Belgrade, Faculty of Organizational Sciences**: master academic studies are open to candidates who "have previously completed undergraduate academic studies with at least 240 ECTS points... or at least eight semesters." Its *Information Systems and Technologies* master is a one-year, 60-ECTS programme.

Consequence: the applicant's 180-ECTS licence does not reach the entry floor for the Serbian one-year model, and no 120-ECTS English-taught alternative surfaced. G8's hypothesis — that the Western Balkans are where the 240-ECTS structure genuinely bites — is **confirmed for Serbia**. This is a country-level finding, not a search gap. Searched: Singidunum (English portal + master admissions), University of Belgrade FON, Serbian higher-education law summaries, StudyInSerbia/obrazovanje.rs registries.

2.2 BOSNIA & HERZEGOVINA — same structure, plus an accreditation problem

- **International University of Sarajevo**: bachelor 4 years/240 ECTS, master **1 year/60 ECTS**. Same structural exclusion as Serbia. ~€3,500/yr.
- **Sarajevo School of Science and Technology**: English-medium, but "in association with the University of Buckingham" — **UK-validation exposure across the portfolio**, which is a brief exclusion, not merely a caveat.
- **International Burch University**: English-medium; master's are "60 to 120 ECTS depending on the bachelor's entry point", so a 120-ECTS route plausibly exists. But its recognition is **cantonal** (Ministry of Education, Science and Youth of Sarajevo Canton) plus **BAC — the British Accreditation Council, a private UK body, not a state accreditor**. Neither the state-recognition test nor the track fit was established. **Not recorded. Genuinely unresolved rather than absent** — see §3.

2.3 MONTENEGRO — no qualifying programme evidenced

University of Montenegro (public, Podgorica) and University of Donja Gorica (private) both advertise English-taught master's, but no track-relevant, English-taught, state-accredited master's programme page was located. The one concrete UDG master identified is an **MSc in Statistics** (120 ECTS, Faculty for International Economics, Finance and Business) — out of both tracks. **Reported as not-found rather than non-existent:** UDG's programme catalogue was not reachable at programme level and this country deserves one more pass with a Montenegrin-language search.

2.4 BULGARIA — effectively empty for both tracks, and the reason is documented

- **Sofia University St. Kliment Ohridski** — its own official page for "Master's Degree programs in English or other foreign languages" names only **Medicine** and **Pharmacy**, and both are 5–6 year integrated first-degree programmes, i.e. excluded by the level rule. Everything else is devolved to faculty websites with no central English list. https://www.uni-sofia.bg/index.php/eng/admission/international_students/master_s_degree_programs_in_english_or_other_foreign_languages
- **UNWE (University of National and World Economy)** — the international tuition page lists a master's fee only for **Law, taught in Bulgarian** (€3,300/yr). UNWE's two English-taught master's most relevant to Track A — *MSc Digital Marketing and Transformation* and *MBA in Global Operations and Analytics* — are **double degrees with Abertay University, Scotland**, and are therefore **excluded by the brief's UK-partner rule**, not merely unverified. The MBA is doubly excluded.
- **New Bulgarian University** — publishes only a fee band for non-EU master's students (10,800–13,200 BGN = €5,522–6,749/yr) with no English-taught programme list; no track-relevant English master's page was reachable.

Verdict: Bulgaria's near-absence from the dataset is close to correct. What exists in Track A is either Bulgarian-taught or UK-validated. Nothing in Track B surfaced at all. G8 was right to record it as unresolved; it now resolves mostly to *nothing qualifies*.

2.5 Track B — programmes checked and correctly absent

Institution	Programme	Why it is correctly absent
University of the Aegean	Cultural Informatics and Communication (incl. <i>Culture and Documentary Film Production</i>)	Greek-taught (ministry register, programme 1467). 90 ECTS, €2,800/yr. A genuine language near-miss.
Ionian University, Corfu	MA Audiovisual Arts in the Digital Age	Language of instruction not stated anywhere on the official page; and entry requires that "the diploma a candidate holds should relate primarily to traditional art forms" — the Track B qualification wall. €2,400 total. Excluded, but see §3.
Ionian University	MARes in Hybrid Arts	Classes delivered remotely ; a Master <i>of Research</i> . Fails the delivery and level tests.
TAMK (Finland)	Master's Degree Programme in Media Production	Finnish-taught , 60 ECTS, multi-modal (TAMK study guide). Finland's most obvious-looking UAS Track B target, and it fails on language.
Hochschule Darmstadt	Motion Pictures	It is a Bachelor (7 semesters), taught almost entirely in English. Not a master. Correctly absent.
Tallinn University BFM	JMD Film Arts (Kino Eyes)	UK consortium partner (Edinburgh Napier) — excluded by the same rule already applied to Lusófona/KINO EYES. Confirms followup #27's suspicion.

Institution	Programme	Why it is correctly absent
ZHdK	six MA Film majors	German-taught.
Alba Graduate Business School	—	No MSc in Business Analytics or Data Science exists. Alba's MSc portfolio is Finance, Strategic HRM, Tourism Management etc., plus four MBAs. There is nothing to record, so the UK-validation question raised in followup #26 is moot for both tracks. Its US NECHE accreditation would in any case have been a problem.

2.6 Track A — checked and correctly absent

- **WHU - Otto Beisheim** Master in Business Analytics: **being phased out, closed to new applicants from 2026.**
- **Nyenrode Business University:** portfolio is MBA/MSc Accountancy-led; no business-analytics master's found.
- **RSM MScBA Business Analytics & Management:** already in the dataset under Erasmus University Rotterdam. Not a duplicate to add.
- **Kozminski Master in Big Data Science:** already in the dataset.
- **Sofia University Digital Marketing MA:** as G8 found, unusable — confirmed.

3. STILL UNRESOLVED

Ordered by how much they would change the dataset.

#	Item	What is missing	What would settle it
V2-1	SEEU (North Macedonia) second-cycle tuition	No published master's fee. The 120-ECTS Business Informatics / Data Science variants otherwise look open to a 180-ECTS holder	One email to <code>financialaid@seeu.edu.mk</code> . Would convert 1–2 rows
V2-2	UNYT Tirana — DSBA programme accreditation + Greenwich status	ASCAL register shows no programme decision for this master; Greenwich partnership scope unconfirmed	ASCAL decision PDF, or a written statement from UNYT. Decides whether Albania yields 1 row or 0
V2-3	AUEB MSc Marketing Analytics — language	AUEB's central list says "Greek and/or english"; the departmental site is fully English and demands C2 English	One email to <code>marketinganalytics@aueb.gr</code> . This is the strongest Greek Track A addition and it hangs on one word
V2-4	Ionian University — MA Audiovisual Arts in the Digital Age, language	Never stated on the official page	Email <code>avarts.ada@ionio.gr</code> . Even if English, the "traditional art forms" entry rule probably closes it
V2-5	SRH Berlin non-EU fee	DAAD says €5,950/semester non-EU; SRH marketing says €5,700/semester flat	The school's own fee schedule

#	Item	What is missing	What would settle it
V2-6	ZHdK MA Design — the other five majors' teaching language	Only Interaction Design confirmed English; the language field renders empty on the other major pages	Firecrawl with JS wait, or the ZHdK admissions office
V2-7	Montenegro (UDG + UCG) programme catalogues	Not reachable at programme level	A Montenegrin-language pass over <code>udg.edu.me</code> and <code>ucg.ac.me</code>
V2-8	International Burch University (BiH)	120-ECTS master route exists in principle; state recognition is cantonal + a private UK accreditor	BiH state/entity accreditation agency register
V2-9	Greek ministry database completeness	<code>masters.minedu.gov.gr</code> has migrated to <code>studies.minedu.gov.gr</code> and its filter UI is JS-paginated. I reached individual records via site-scoped search, not a systematic sweep of all 1,368	A crawl of <code>studies.minedu.gov.gr/program/?programme_id=N</code> — the records are cleanly numbered and each states language, ECTS, fee and delivery mode. This is the single highest-yield unexploited resource in the whole project and it is cheap: the pages are static and WebFetch-readable once you have the numeric ID
V2-10	TIAS MScBA ECTS and non-EU deadline	Not published	TIAS admissions
V2-11	EKA/TalTech Design and Technology Futures (Estonia)	120 ECTS, English, joint EKA+TalTech; entry requires a prior degree "in technology, design or innovation" plus a portfolio. Track B fit is arguable (design, not media production) and the non-EU fee was not confirmed from an official page	<code>artun.ee</code> admissions pages; then a track-fit decision

4. ASSESSMENT PER TERRITORY (Wave 1 groups)

Group	Territory	Verdict	Reasoning
G1	DACH (DE/AT/CH/LI)	Adequate, with two named holes now filled	21 rows. Germany's public Track B coverage is genuinely good. The private sector was under-searched: EBS (Track A) and SRH Berlin (Track B) were both missed, and both are state-recognised. ZHdK is now resolved for Interaction Design. Austria and Liechtenstein look correctly thin.
G2	Benelux	Adequate → good, one clear miss	24 rows and strong Track B. Leiden's renamed programme was dropped rather than updated — a maintenance failure, not a search failure. TIAS was never checked. Followups #2 (Tilburg/JADS), #3 (Vlerick), #8 and #9 remain open and are V1's to resolve.
G3	France	Adequate	14 rows. Not re-audited here beyond confirming no Track B leakage; followup #1 (X-HEC) is a V1 fact question.
G4	Nordics	Adequate	22 rows across five countries with a well-documented Track B entry-qualification wall. Not re-audited; the open items are fee/accreditation facts, not coverage.

Group	Territory	Verdict	Reasoning
G5	Ireland / Malta / Cyprus / Greece	Ireland, Malta, Cyprus adequate. GREECE WAS UNACCEPTABLE — now materially repaired	Greece held 2 rows against a public university system that runs a fully English-medium international centre plus HAHE-certified English MSc programmes at AUEB and AUTH at €1,800–6,000 <i>total</i> . Five qualifying programmes were absent, one of them (AUTH Digital Media – Computational Intelligence, €1,800 all-in, in-person) is among the best value-for-money rows in the entire dataset. The failure was tooling, not judgement: <code>ihu.gr</code> and the ministry database both return 503 to WebFetch and needed Firecrawl, and the agent's budget was spent.
G6	Iberia	Not re-audited	G6's own structural finding on Spanish-language Track B is well-evidenced and I found no reason to doubt it. Followups #14–#19 are unaddressed by this pass.
G7	Italy	Not re-audited	Followups #6, #7, #10 remain open.
G8	CEE / SEE (17 countries)	Thin, but less culpable than it looks — and the biggest single gap is now closed as a negative, not a positive	The six zero-coverage countries yield, on the evidence: one qualifying programme (Moldova/UTM), two blocked candidates (SEEU North Macedonia on fees, UNYT Albania on accreditation), and three structural exclusions (Serbia, Bosnia, and — pending one more pass — Montenegro) . Serbia and Bosnia run 4+1 with a 240-ECTS entry floor and are effectively closed to this applicant regardless of language. Bulgaria resolves to near-empty for documented reasons. G8's silence was largely correct; the dataset was not missing much, but nobody could have known that until it was checked. Poland/Croatia/Romania/Lithuania second-tier institutions (followup #13) remain genuinely unchecked.

Cross-cutting observations

- The dataset has an unstated Track A boundary rule and it is applied inconsistently.** Utrecht, Tilburg (Data Science and Society) and HSLU are in; IHU Data Science, AUEB AI and Data Science and NKUA DSIT would be out on the same criterion. Someone should write the rule down and re-apply it in one pass, in either direction. Until then, "is X missing?" has no determinate answer for general applied-data-science degrees.
- Delivery mode is not captured in the schema and it now matters.** F3's finding that MESRS requires in-person examination makes hybrid/distance delivery a disqualifier, not a footnote. Both IHU programmes are hybrid; AUTH's is in-person; the Greek ministry register publishes this field for every programme. **The schema has no column for it.** That is a structural omission affecting far more than Greece.
- The 240-ECTS risk is real but geographically narrow.** It binds hard in Serbia and Bosnia and probably Montenegro; it does *not* bind in Moldova (120-ECTS masters), North Macedonia (explicit 3+2 route at 120 ECTS) or anywhere G8 previously checked. G8's original reading — that subject composition, not total credits, is the usual danger — survives, with the Western Balkans as the documented exception.
- Track B remains the weak track, but for a reason that is now clear.** Of every Track B programme examined in this audit, exactly one — SRH Berlin — admits on portfolio rather than on a prior degree in the field. The realistic Track B universe for this applicant is much smaller than the row count suggests, and the shortlist should be filtered on `quantitative_prereqs` before anything else.

Firecrawl usage

14 calls of the 90 allocated (≈46 credits, leaving ~250 of the shared 297). Breakdown: IHU UCIPS index + 3 IHU programme pages (4); ZHdK — 2 site maps and 4 page scrapes (6); Leiden CIT (1); UTM Moldova fee schedule (1); Singidunum master admissions (1); one wasted call on a ZHdK redirect shell (1).

Firecrawl was used only where WebFetch failed outright: `ihu.gr` / `st.ihu.gr` and `masters.minedu.gov.gr` return **HTTP 503** to WebFetch on every path, and `zhdk.ch` , `universiteitleiden.nl` , `international.utm.md` and `singidunum.ac.rs` render their programme facts client-side. Everything else in this audit was done with unmetered WebSearch and WebFetch.
