

Follow-up queue

European Master's & Scholarship Research · Tunisian applicant, 180-ECTS Licence in Business Intelligence · compiled 2026-08-16 · 181 programmes, 103 funding schemes

Items Wave 1 agents flagged as unresolved and explicitly handed forward. Wave 3 (V1 fact-integrity, V2 coverage) consumes this list. Each entry names what to check and where, so no item depends on rediscovering the context.

#	Item	Territory	What to verify	Why it matters
1	HEC Paris / École Polytechnique — MSc Data Science & AI for Business (X-HEC)	G3 France	Whether it confers <i>grade de master / diplôme visé</i> . Check polytechnique.edu's own MSc&T accreditation page — the HEC pages don't state it.	Arguably the strongest Track A match in France. Application rounds already published for the target cycle (R1 2026-10-07 → R4 2027-04-28). Excluded pending this check.
2	Tilburg — MSc Data Science in Business and Entrepreneurship (JADS)	G2 Benelux	Programme page: ECTS, non-EU deadline, 3-year-bachelor acceptance. Fee listed €23,900 (26/27).	Squarely Track A. Dropped for a procedural reason (avoiding a duplicate Tilburg cluster), not a rule violation — it belongs in the dataset.
3	Vlerick Business School masters	G2 Benelux	Whether the "Masters in ..." portfolio maps to NVAO-accredited Flemish master degrees. NVAO register shows decisions only for <i>Innovation and Entrepreneurship</i> and an MBA.	€20,950–22,950/yr. If not NVAO-accredited it fails MESRS equivalence — a costly mistake to make late.
4	ZHdK Zurich — Track B masters	G1 DACH	Which ZHdK MAs are English-taught. Programme list returns an empty shell to plain fetch; needs Firecrawl scrape.	The one known gap in Swiss Track B.
5	Leiden — MSc Media Technology	G2 Benelux	Current title, ECTS, whether production-oriented. Appears renamed/absorbed into <i>Creative Intelligence and Technology</i> .	Was a listed Track B target; status unresolved.
6	Bologna DAMS/Cinema, IUAV Venice, Centro Sperimentale di Cinematografia, state Accademie di Belle Arti	G7 Italy	Whether any second-cycle programme is English-taught. Assessed from prior evidence, not individually fetched.	Determines whether Italian Track B is genuinely limited to POLIMI + private academies.
7	IED Milano — MA Visual Communication	G7 Italy	A MIM/MUR accreditation decree for IED Milano second-level courses (one exists for IED Firenze, and for Milan/Rome/Turin first-level only).	Page claims <i>Diploma Accademico di Secondo Livello</i> , 120 CFA, English. Reported not recorded — resolvable only by decree or direct enquiry.
8	ARES exemption circular (Belgium)	G2 Benelux	Whether a Tunisian national can be exempted from the €4,175 non-EU supplement. Categories named are LDCs, scholarship holders, long-term residents.	Tunisia is not an LDC, so the applicant likely pays the full €5,369. Unconfirmed — the circular itself was never opened.

#	Item	Territory	What to verify	Why it matters
9	Ghent tuition figure	G2 Benelux	Two different non-EEA figures on two official UGent pages (€6,929 vs €6,540.10), neither naming an academic year.	Straight fact conflict; V1 must resolve which cycle each belongs to.
10	Italian post-study work permit	G7 Italy	Official ministry statement of the <i>permesso per attesa occupazione</i> terms.	post_study_work_visa is NOT_FOUND on every Italian row because no official source was reachable.
11	Serbia, Albania, North Macedonia, Montenegro, Bosnia & Herzegovina, Moldova	G8 CEE	Zero coverage — not a single institutional page was opened. Needs a dedicated pass.	G8's search allowance ran out a third of the way through 17 countries. Silence here must not be read as "nothing exists", and these are the countries where the 240-ECTS structural risk is most likely to be real.
12	Bulgaria	G8 CEE	Sofia University and the other state universities. Only Sofia's Digital Marketing MA surfaced, and it is distance-format with Bulgarian-language admission rules and no published fee.	Same as above: unresolved rather than empty.
13	Poland, Croatia, Romania, Lithuania — second tier	G8 CEE	Not reached: Poznań UEB, Wrocław UEB, Cracow UE, AGH, SWPS; Zagreb Faculty of Economics, ZSEM, Academy of Fine Arts Zagreb, ADU; UNATC Bucharest, Politehnica; KTU, VDU.	Coverage is substantial but explicitly not exhaustive in these four countries.
14	UPF — Master in Digital Culture and Emerging Media	G6 Spain	Language of instruction. The page carries an English title, English CV/motivation requirement and a B2 English floor, but never states the teaching language.	Officially recognised UPF master. The single most likely additional Spain Track B row — Spain currently yields only two.
15	Universidad Pontificia Comillas — Máster Universitario en Análisis de Negocio / Business Analytics	G6 Spain	Language of instruction. Official status already confirmed (BOE-A-2025-15932); the programme page was unreachable.	Second-most-likely additional Spain Track A row.
16	EADA, EAE, ESIC, Deusto, IED Madrid/Barcelona, Elisava, BAU, U-tad	G6 Spain	<i>Oficial vs propio</i> status of any English-taught master.	Unverified, not rejected — the distinction is unclear from their marketing pages, which is exactly the trap the brief warns about.
17	Lusófona tuition	G6 Portugal	An annual figure. The site publishes a per-ECTS rate (€11.18-12.68) and a "monthly value for 30 ECTS" (€335.40-380.40) that are mutually inconsistent; the fees pages render empty.	Four Track B rows carry NOT_FOUND tuition. Lusófona is the only Portuguese provider running English-taught DGES-registered media-production masters at scale, so these rows matter disproportionately.
18	Portugal post-study work permit	G6 Portugal	Article 122. ^o -O terms from an official source. AIMA returned 503 repeatedly; SEF's site is retired.	post_study_work_visa is NOT_FOUND on all eight Portuguese rows.
19	ISEG, U.Porto, U.Aveiro, IPCA, ESAD, Escola Superior de Teatro e Cinema	G6 Portugal	Not reached before the search allowance ran out.	Portuguese coverage is incomplete, particularly for Track B outside Lusófona.

Transcript audit — act on this early

G8 surfaced the single most actionable finding of Wave 1 so far: **in the countries it verified, the danger to a 180-ECTS holder is not total credits but subject composition.** No country it reached imposes a blanket 240-ECTS rule — Ljubljana states 180 is sufficient in writing, and Czechia, Poland, Estonia and Hungary accept a bachelor in any field. But three institutions gate on *specific prior credits*, which is exactly where a Business Intelligence licence can fail:

- **Corvinus (Budapest)** — 18–24 ECTS required across methodology, economics and business-studies categories, assessed per programme. Binds all four Corvinus rows.
- **Vilnius, Digital Marketing** — minimum 20 ECTS in Business/Public Management or Economics, plus a 70% grade average.
- **Vilnius, Strategic Management of Information Systems** — minimum 20 ECTS in microeconomics, macroeconomics or econometrics (or three years' verified work experience), plus a 60% average.

Two recency cliffs that appear in no aggregator listing: Vilnius University requires that non-EU applicants' gap since the bachelor not exceed five years, and Romania's ASE FABIZ requires non-EU applicants to have graduated in 2023 or later. Both behave as hard eligibility cutoffs.

Practical consequence: the applicant's Esprit transcript should be audited against those ECTS categories before any application effort is spent. That is a higher-value action than any further searching.

Deliberate exclusions worth surfacing to the applicant

Not errors — correct calls under the brief — but each is a real option the applicant may want to reconsider, so they belong in `gaps_and_risks.md` rather than vanishing.

- **University of Luxembourg — Master in Data Science.** 120 ECTS, English, **€800/year including non-EU** — by a wide margin the cheapest qualifying-level programme found anywhere in the sweep. Excluded because it sits in maths/CS with no business-analytics specialisation, so it fails the Track A definition. If the applicant will accept a general data-science master, this is the single strongest cost outlier in the dataset.
- **Luxembourg Track B: nothing exists.** The full 2026 master's brochure contains no media-production, film, digital-media or media-design master.
- **LUCA School of Arts, RITCS, KASK/HOGENT** (Flemish audiovisual arts) — Dutch-taught, no English variant found. Language near-misses.
- **Universitat d'Andorra — Master of Data Analytics.** 120 ECTS, AQUA-accredited, and it explicitly accepts 3-year bachelors — but taught in Catalan.
- **FH St. Pölten — Digital Media Production.** German-taught; otherwise close to a perfect Track B match at €1,500/semester.
- **Monaco** — no programme in either track; the entire IUM master portfolio is management/finance plus an MBA and DBA.

Additional deliberate exclusions from G6 (Spain / Portugal)

- **ISCTE Business School — Master in Business Analytics and Master in Data Science.** Non-EU tuition €5,000 year 1 / €2,500 year 2 — cheap, and an exact Track A title. Excluded because ISCTE states the programmes are lectured in Portuguese, with only three Data Science units deliverable in English. Worth revisiting only if the applicant's Portuguese changes.
- **ESCAC — Máster Universitario en Estudios de Cine y Culturas Visuales** (Universitat de Barcelona, official, 60 ECTS, €5,200). Spain's strongest film-school official master; Spanish-taught.

- **Berklee Valencia — MM Music Production, Technology & Innovation** and the two other production masters (€50,430). These are **US Berklee degrees carrying no Spanish official title** — only Berklee's Global Entertainment and Music Business master holds a Spanish RUCT registration, and that one is an entertainment-business degree fitting neither track. Given the applicant's music-production practice this is the most tempting exclusion in the dataset, and the level rule is unambiguous.
- **Universidad de Navarra — Máster Universitario en Big Data Science.** Official, but Spanish-taught *and* delivered in a Friday/Saturday executive format.
- **Lusófona / KINO EYES — The European Movie Master** (Erasmus Mundus). Excluded under the UK-partner rule: Edinburgh Napier is a consortium partner. Flagged here because Wave 2's F1 agent will encounter it in the EMJMD catalogue and must apply the same rule.

Structural finding — Spain Track B. Two verified rows only, after searching in Spanish and Catalan across ESCAC, ECAM, UPF Communication, UPV, IED, Elisava, BAU, U-tad, URJC/IUNIT and Berklee Valencia. The pattern is consistent and structural: Spain's official media and film masters are almost all taught in Spanish or Catalan, and the English-taught media offer is concentrated in private schools selling *títulos propios*. This is a finding about the country, not a gap in the search.

G4 (Nordics) follow-ups

#	Item	What to verify	Why it matters
20	BI Norwegian Business School accreditation	NOKUT accreditation as a specialised university institution. BI's own page says only "an independent, not-for-profit foundation".	Tagged <code>private</code> unconfirmed. MESRS equivalence depends on it and BI is a headline Track A name at NOK 135,600/yr.
21	Reykjavík University accreditation + tuition	Icelandic ministry accreditation; tuition published only inside linked PDF fee schedules that the scrape could not reach.	Private, unconfirmed on both counts.
22	NTNU (Norway)	Non-EEA fee page (<code>ntnu.edu/studies/tuition-fee</code>); search suggested NOK 176,300/yr for economics/social science.	The one Norwegian institution left unopened. No row created.
23	Luleå (LTU) tuition	The fee table lists "Data Science" and "International Business" but has no row for Data Analytics in Business and Economics.	Recorded <code>NOT_FOUND</code> rather than inferred from a neighbouring programme.
24	University of Lapland — Arctic Indigenous Cinema MA	Whether admission is open irrespective of Indigenous background. €13,000/yr with a €6,000 scholarship, 120 ECTS, English.	A genuine Track B match excluded only because eligibility could not be confirmed.
25	Post-study work rights, all five Nordic countries	Official immigration-authority statements.	<code>post_study_work_visa</code> is <code>NOT_FOUND</code> on all 22 Nordic rows; the agent refused to assert terms from memory.

Structural finding — Track B has an entry-qualification wall

This is now visible across three territories and is more consequential for this applicant than tuition or deadlines. **Media-production masters overwhelmingly require a prior degree in the field, not merely a portfolio.** The applicant's videography and music-production practice is real but sits outside a media bachelor, and these are hard eligibility rules rather than preferences:

- **Konstfack (SE)** — requires a Bachelor of Fine Arts; selection on artistic portfolio and interview.

- **Stockholm University of the Arts (SE)** — requires a BFA plus a degree project from a Film and Media bachelor. Also the most expensive programme found anywhere in the sweep: SEK 1,346,000 total.
- **Kristiania (NO)** — 80 ECTS required within audiovisual media, storytelling, visual art, design or technology.
- **Volda (NO)** — 90 ECTS in media/journalism plus 40 ECTS of practical courses.
- **Xamk (FI), Virtual Production** — the strongest Finnish UAS match on content; restricted to Bachelor of Engineering or Bachelor of Culture and Arts holders **plus two years' post-degree work experience in the field**.
- **Le Fresnoy (FR)** — bac+5 or seven years' professional experience.
- **La Fémis (FR)** — 4-year cursus entered at bac+2.

Consequence for the shortlist: Track B candidates must be filtered on `quantitative_prereqs` / prior-degree subject before cost or deadline. The realistic Track B openings for a Business Intelligence graduate are the technology-and-media-hosted programmes (interaction design, media technology, digital media at applied-sciences universities) rather than the film and fine-art academies — and that distinction should drive the Track B shortlist rather than programme prestige.

G5 (Ireland / Malta / Cyprus / Greece) follow-ups

The Cypriot private sector is an accreditation minefield — G5's most valuable finding. Four programmes were rejected because their CYQAA accreditation has lapsed with no renewal row in the register. These look entirely normal on their own websites, and a degree from a programme whose accreditation expired will not pass MESRS equivalence:

Institution	Programme	CYQAA status
Neapolis University Pafos	MA Digital Video Production (~€3,500)	expired Spring 2022 — was the single most on-target Track B match in Cyprus
European University Cyprus	MSc Digital Media	expired Spring 2023
The Cyprus Institute	MSc Simulation and Data Science	expired Spring 2023
University of Nicosia	MA Digital Art and Design	runs only to Spring 2026 — already lapsed

Each is worth a direct enquiry (accreditation may have been renewed without the register being updated), but none can be recorded as verified today.

#	Item	What to verify	Why it matters
26	Greece — International Hellenic University , Piraeus, NKUA, West Attica, Ionian University (audiovisual arts), American College of Greece / Alba	English-taught master's catalogues. IHU is a public university teaching exclusively in English and is likely the richest unexplored Greek source. Alba needs a UK-validation check.	Greece yields only 2 rows. The agent estimates a proper pass adds 4–8. The ministry database holds 1,368 programmes behind JS pagination and needs a crawl budget.
27	IADT — KinoEyes / Viewfinder joint MAs	Consortium partner lists. KinoEyes historically includes a UK partner.	Flagged not recorded, pending partner verification. Wave 2's F1 will meet these in the EMJMD catalogue and must apply the same rule.

#	Item	What to verify	Why it matters
28	Post-study work rights: Malta, Cyprus, Greece	Official third-country post-study residence rules.	Only Ireland's is verified (Stamp 1G: 12 months, renewable once to 24). The agent calls this the largest remaining gap in the territory and a real differentiator.
29	Neapolis — MA Digital Video Production	Whether CYQAA accreditation was renewed after Spring 2022.	Cheapest on-target Track B programme found in the whole sweep (~€3,500). Worth one email.

Excluded but worth reconsidering if the Track A definition is loosened: National College of Ireland MSc Data Analytics (€17,000, January 2027 start, IELTS 6.0), Maynooth MSc Data Science and Analytics (€17,000) and MSc Digital Marketing (€18,000). All are QQI-accredited NFQ Level 9 awards; all were excluded only because they sit in a school of computing without an explicit business-analytics specialisation.

UK-linked exclusions applied correctly: UCLan Cyprus (MSc Data Analytics, MSc/MA Graphic Design) is the Cyprus campus of a UK institution.

Irish equivalency note: no Irish page states a rule for a Tunisian 180-ECTS licence. Entry text uniformly reads "NFQ Level 8 honours degree or equivalent", which is an individual assessment rather than a published yes/no — so `min_prior_ects` is `NOT_FOUND` on every Irish row and `accepts_3yr_bachelor` is `conditional`. For this applicant that means Ireland cannot be cleared in advance from public pages; it requires per-programme enquiry.

F4 (institution-level scholarships) follow-ups

~89 of 123 institutions were never checked. F4 worked strictly down the priority order and stopped after the high-tuition tiers plus one art school. Unchecked and worth a second pass, in rough value order: Barcelona School of Economics, Carlos III, Politecnico di Milano, Ca' Foscari, Bologna, Trento, WU Vienna, USI, HSLU, ECAL/HEAD, LUT, Oulu, BTH, Luleå, all Belgian, all French public, all German public, all Czech/Polish/Romanian/Baltic/Slovenian institutions, plus the Track B schools (FAMU, RUFA, Piet Zwart/Rotterdam UAS, AHK, AUAS, Macromedia, MOME, PJAiT, ifs Köln, Filmuniversität Babelsberg, Louis-Lumière, ENSAV).

#	Item	What to verify	Why it matters
30	Católica-Lisbon scholarships	Fees/scholarships page returned 503 to WebFetch and empty to Firecrawl. Only the bachelor's scheme was readable.	A Track A institution with no scholarship data at all. Worth a retry.
31	IE Middle East & Africa Award	The eligible-region country list renders client-side behind a "More info" control; neither WebFetch nor Firecrawl retrieved it.	Recorded <code>unclear</code> . IE tuition is among the highest in the dataset, so the answer is worth real money.
32	Amsterdam Merit Scholarship (UvA)	Amounts and deadlines are devolved to each Faculty/Graduate School and not published centrally. Check Economics and Business (Track A) and Humanities (Track B) separately.	<code>NOT_FOUND</code> on value and deadline.
33	Frankfurt School master scholarship	The published 15/25/50/75/100% ladder belongs to the BSc programme; the master's page says only "a partial amount of tuition".	Value unknown for a school charging non-EU master's fees.
34	UCC College of Business and Law merit scholarships	Confirmed to exist and to be automatic, but no value, eligibility detail or deadline is published anywhere.	Recorded at <code>low</code> confidence with three <code>NOT_FOUND</code> fields.

Institutions confirmed to offer a non-EU master's applicant nothing

These are useful negatives — they close off options that look plausible from outside:

- **NHH (Norway)** — states plainly that as a publicly financed institution it offers no scholarships or financial support to students. Non-EU fee €18,660.
- **Trinity College Dublin** — its Global Excellence Postgraduate Scholarship **exempts** business, engineering, natural sciences and computer science/statistics. Trinity's Track A programme sits in the Business School, so it is excluded.
- **Utrecht** — Bright Minds Fellowships require an EU/EEA passport.
- **Kozminski** — the 100% "Best Students" award covers only Management and Finance and Accounting, not the Track A Big Data Science programme.
- **Corvinus** — the full-tuition Corvinus Scholarship is limited to Management and Leadership, Finance and the International MBA; none of the Corvinus rows in this dataset qualify. Only the 10% early-bird discount applies.
- **Breda UAS** — both BUas and NL Scholarship schemes are bachelor's-only.
- **IADT and TU Dublin** — no institutional award for an incoming non-EU master's applicant.
- **ESMT Developing Country Scholarship (LDC/LLDC)** — points at the UN LDC and LLDC lists; **Tunisia is on neither**, so it was correctly kept out of the dataset.

F2 (national schemes) follow-ups

#	Item	What to verify	Why it matters
35	Government of Ireland International Education Scholarship	The HEA domicile criterion (outside EU/EEA/CH/UK) is met, but Trinity's page refers to a separate "list of eligible countries" that is not published on the HEA site. Chase goi-ies@hea.ie directly.	Worth €10,000 plus a full fee waiver. Recorded unclear — the only unresolved national scheme of real value.
36	Camões (Portugal)	Whether "Bolsas da Cooperação" extends beyond PALOP/Timor-Leste. No country list was reachable.	Portugal's only national route; not recorded.
37	IKY (Greece)	Foreign-national awards run through bilateral cultural-agreement channels that could not be opened.	Greece already yields only 2 programmes; a funding route would change its weight.
38	Estonia	Whether any national state scholarship for a full master's exists. studyinestonia.ee/scholarships returns 404.	Estonia contributes 4 Track B rows.

National schemes confirmed CLOSED to Tunisians — do not spend effort here

The negatives are as valuable as the positives, because several of these appear on every "scholarships for African students" listicle:

- **Swedish Institute (SISGP)** — 34-country list. **Morocco and Egypt are in; Tunisia is not.**
- **Czech Government Scholarships** — 12-country list, no North Africa.
- **VLIR-UOS ICP Connect (Belgium)** — 29 countries; only Morocco and Palestine from MENA.

- **Latvian State Scholarships** — 39 bilateral-agreement countries; only Egypt from Africa.
- **Lithuanian State Scholarships** — 17 countries, Tunisia absent.
- **DAAD Study Scholarships - Master Studies for All Academic Disciplines** — Tunisia is absent from the country selector **even though the funding cycle starting 1 Oct 2027 matches this applicant exactly**. F2 flags this as the highest-risk false positive in the set: it is the scheme everyone assumes a Tunisian can use, and they cannot.

Schemes that exist but fund nothing this applicant needs

- **Orange Knowledge Programme (NL)** — **ended 2024**. Nuffic now runs only short courses, Erasmus+ and the NL Scholarship.
- **Finland** — **no national scheme exists at all**. Study in Finland states scholarships are offered by individual universities and explicitly warns against "fully funded Finland government scholarship" advertising. Treat any such claim as fraudulent.
- **Swiss Government Excellence Scholarships** — for Tunisia these cover **research fellowships and PhD only** (deadline 2026-10-13 via the Swiss Embassy in Tunis). The art-scholarship stream, which is the only master's-funding type, excludes Tunisia.
- **OeAD Ernst Mach (Austria)** — funds 1-9 month research stays, not degrees.
- **Slovak SAIA** — states explicitly that it does not support full-degree students.
- **MAEC-AECID África-Med (Spain)** — Tunisia is listed, but applicants must be permanent public employees.
- **DAAD EPOS** — Tunisia eligible, blocked by a 2-year work-experience requirement.
- **DAAD Fine Art/Design/Film** — Tunisia eligible, requires a first degree in the arts, which is the Track B qualification wall again.

F3 (Tunisian side) — the finding that outranks everything else

MESRS equivalence may reject a one-year master's. The governing text is the *arrêté* of 10 October 2023 (JORT n°119, 17 Oct 2023, p. 5544). Articles 8 and 9, covering equivalence to the Tunisian *Mastère professionnel* and *Mastère de recherche*, require a licence holder to have **"successfully completed two years of study after the licence"**, and each closes with **"in all cases, equivalence is granted to whoever has successfully completed not less than five (5) years of university study."**

A 60-ECTS one-year European master's on a 3-year licence yields four years total and one year post-licence. **On the face of the arrêté that does not satisfy Article 8 or 9.** A 120-ECTS two-year master's yields five years and does.

Measured exposure across the 168-programme dataset: 51 rows (30%) are at risk.

Country	At-risk rows	Note
Ireland	15 of 15	Every Irish row. The entire territory is one-year taught masters.
Netherlands	11 of 16	
Spain	7 of 7	
Cyprus	3 of 4	

Country	At-risk rows	Note
Greece, Iceland, Malta	all rows	
Poland, Hungary, Sweden, Germany, Portugal, France	1–2 each	

111 rows (66%) satisfy the two-year rule; 6 cannot be assessed because both `duration_months` and `ects` are NOT_FOUND.

Status of this finding: it is F3's reading of the statutory text, not a ruling from the commission. It must be confirmed in writing with the Direction de l'Enseignement Supérieur Privé et des Équivalences before it is treated as settled. But it cannot be ignored, because if correct it removes Ireland — the single richest English-taught source in the dataset — from consideration for anyone who needs the degree recognised in Tunisia.

It only binds if the applicant needs Tunisian recognition — for the public sector, a regulated profession, a doctorate, or any *concours*. A graduate who stays in Europe is unaffected. This makes the applicant's post-study intention the single highest-value unresolved question in the whole brief, ahead of budget and funding posture.

Three further equivalence criteria that bite (arrêté art. 2)

- **Examinations must be held in person** ("الصيغة الحضورية للامتحانات") — distance or hybrid-assessed programmes are at risk. This retrospectively justifies excluding TU Dublin's online MSc and EUC's distance programmes.
- **The programme must not be designed specifically for foreign students** — a real hazard for fee-driven international master's.
- **Both institution and diploma must be recognised in the awarding country** — this is exactly the check that kills *master propio*, *Mastère Spécialisé* and the lapsed Cypriot accreditations.

Equivalence procedure and timing (for the deadline calendar)

Since 1 August 2023: complete the form at **equivalence.rnu.tn**, print it, assemble the dossier, and send it **exclusively by registered post with acknowledgement of receipt** to the Direction de l'Enseignement Supérieur Privé et des Équivalences, Avenue Ouled Haffouz, 1030 Tunis. **Incomplete files are not examined at all.**

Required: certified copies of the baccalauréat and every diploma in sequence, legalised by both Tunisian and foreign authorities; certified transcripts and credit counts; the mémoire/PFE; **proof that examinations were held in person**; sworn translations for anything not in Arabic, French or English.

No official processing time is published. The only figure found is 2–6 months, from a non-official source. Plan a minimum of one full academic term between graduating abroad and holding a usable *attestation d'équivalence* — and note that legalisation by the awarding country's ministry must happen **before** posting, which is itself a multi-week step to arrange while still on site in Europe.

Tunisian state funding — what MESRS actually offers

Bourse universitaire à l'étranger (Mastère/Doctorat) is real and covers Europe: **€800/month in the EU — €600 grant plus €200 loan repayable over ten years** — plus tuition, social cover, health insurance, study permit and transport. It requires a signed undertaking to return to Tunisia and a *caution solidaire* from a guarantor.

Timing, and it is early: the 2026-27 circulaire was published 24 October 2025 with results on 30 January 2026. Expect the 2027-28 call around **October 2026 with results in late January 2027** — before most European deadlines and well before graduation.

Selection is not by direct application. The home institution nominates its *étudiants premiers/lauréats* in the specialisations named in the annual circulaire; then psychological tests, a written and oral language test, ranking by points, oral examination before professor panels, and a decision by the Commission Nationale des Bourses à l'Étranger. UTM adds: degree obtained one or two years earlier, no more than one repeated year, average $\geq 12/20$.

#	Item	What to verify	Why it matters
39	Whether Esprit students can be nominated for the MESRS bourse	Call DGAE directly. The entire procedure is written around public universities, and the <i>bourse d'alternance</i> variant is expressly limited to students of <i>établissements universitaires publics</i> .	Esprit is private. If private-institution students cannot be nominated, the main Tunisian state funding route is closed and this must be known before October 2026.
40	MESRS equivalence rule, in writing	Direction de l'Enseignement Supérieur Privé et des Équivalences — whether a 60-ECTS one-year master's on a 3-year licence satisfies arts. 8/9.	Decides whether 51 of 168 programmes are usable. The highest-leverage question in the project.
41	Bourse call date conflict	best.rnu.tn's timeline says October; Université de Tunis El Manar's page says the call appears in February.	Recorded <code>NOT_FOUND</code> rather than guessing. A six-month error here is fatal.
42	Swiss Art Scholarship country list	Published from August 2026 . Only Swiss instrument funding an initial master's; relevant to Track B.	Recheck after 2026-08-20 — that is now.
43	IsDB-France (200 excellence scholarships, 12 to Tunisia, €700/mo)	Whether it still exists. Only surviving page describes 2020/21; the Campus France Tunisie equivalent 404s; absent from IsDB's 2026-27 list.	Would be directly on-target if live.

Ruled out for Tunisians — with the clause, so nobody re-checks them

- **IsDB M.Sc. programme** — double exclusion: restricted to the **20 Least Developed member countries** (Tunisia is a member but not an LDMC) *and* requires study at a university **in an IsDB member country**. Europe does not qualify.
- **Aga Khan Foundation ISP** — Tunisia not on the country list.
- **Mo Ibrahim Foundation** — African nationals qualify, but both awards are held in the **UK**, which the brief excludes.
- **Said Foundation** — Syria/Jordan/Lebanon/Palestine, UK only.
- **Fondation Hassan II** — **Morocco-only**, as suspected. Do not carry forward.
- **AMIDEAST Tunisia** — active but **entirely US-facing** (Fulbright, J-1, Study in the USA). No EU scheme.
- **AFD** — funds system reform (ELIFE, PRIMEA/EFOR). No individual student instrument.
- **World Bank** — PromESsE and its successor fund institutions; the only mobility window, PAQ-MOBIDOC, is **doctoral and post-doctoral only**.
- **Arab Fund (AFESD)** — fellowship is for **PhD holders**.
- **Fondation Rambourg** — arts and culture inside Tunisia, plus an endowment at Columbia (USA).

- **ARES (Belgium)** — Tunisia is a partner country, but eligibility requires permanent residence and employment in Tunisia **plus two years' professional experience after graduation**. A 2027 graduate does not qualify.
- **French government schemes** — *grandes écoles* (CPGE entrants only), *Ingénieur-Ingénieur* (bac+4 engineering), *partenariales M2 recherche* (requires already being in a Tunisian M1). **None is open to a licence holder applying from outside**. Eiffel is, but is submitted **exclusively by the French institution** — it must be negotiated with the host's international office alongside admission.
- **Tunisian diaspora and professional-association funds** — searched in French and Arabic (ATUGE, Fondation BIAT, Tunisian-American associations). **Nothing found**. F3 reports this as a genuine absence, not a search gap.
