

Shortlist — 15 Track A, 15 Track B

European Master's & Scholarship Research · Tunisian applicant, 180-ECTS Licence in Business Intelligence · compiled 2026-08-16 · 181 programmes, 103 funding schemes

Drawn from 181 verified programmes. Ranked on fit to the actual profile — Tunisian national, 180-ECTS Licence in Business Intelligence from a **private** institution, French and English fluent, Python/SQL/ML/Power BI/Talend, videography and music production as practice, no media degree — not on prestige.

Cost column is tuition only, per year, for a non-EU applicant, as published. Living costs are excluded because only 11% of rows carry an official figure and the brief forbids estimates. "After funding" shows the realistic figure if the named scheme lands; where nothing plausible exists, it says so.

Four filters did the real work, in this order:

1. **Prior-degree subject.** Most Track B masters require a media or fine-art bachelor. That is an eligibility rule, not a preference, and it eliminates more good matches than cost does.
2. **The two-year question.** The Tunisian equivalence *arrêté* (art. 8/9) wants two years of study after the licence. Article 5 lets commissions waive that where ECTS are sufficient, so a one-year master is **discretionary risk, not disqualification** — but a 120-ECTS two-year programme carries no such risk at all. Marked **2yr** below.
3. **Specific prior credits.** Corvinus wants 18–24 ECTS in named categories; Vilnius 20 ECTS in economics; EMAI 12 ECTS each of maths, programming and computing science. Audit the transcript before applying.
4. **Cost after realistic funding**, not sticker price.

TRACK A — Business Analytics

#	Programme	Country	2yr	Tuition/yr	After funding	The specific risk
1	DEAI — Data Engineering & AI (Erasmus Mundus: ULB, UPC, Padua, TU Wien)	BE/ES/IT/AT	✓	€0 with EMJM	€0 + €1,400/mo	Consortium deadline ~mid-January, a year ahead of entry. Scholarship is competitive, but its rubric explicitly awards points per year of work in a BI position and it accepts a 180-ECTS bachelor.
2	Master of Science Data Science & AI for Business (X-HEC) — École Polytechnique + HEC	France	✓	€28,950 (yr 1)	Eiffel €1,200/mo, no tuition cover	Cost. €28,950 is the Polytechnique year only; the HEC year is unpublished. Confirm total before committing. Two years / 140 ECTS with <i>grade de master</i> .
3	MSc Business Analytics — University of Geneva	Switzerland	✓	€1,070	€1,070	Admission is the hurdle, not cost. <code>accepts_3yr_bachelor</code> unpublished — ask first. Swiss living costs are the real expense.
4	Data Analytics for Business and Society — Ca' Foscari Venezia	Italy	✓	€1,300	Italian ISEE may reduce further	Explicitly accepts a 3-year bachelor. Italian <i>requisiti curriculari</i> may demand specific SECS-P/INF credits — check the transcript.

#	Programme	Country	2yr	Tuition/yr	After funding	The specific risk
5	Business Analytics & Econometrics — University of Cologne	Germany	✓	€0	€0	No published ECTS floor, and German programmes commonly want 210-240. Ask before investing effort. Econometrics-heavy.
6	MSc Applied Data Science and AI — HSLU Lucerne	Switzerland	✓	€2,782	€2,782	Accepts a 3-year bachelor. Applied-sciences rather than research-track — a strength for employability, a limit for later doctoral study.
7	Master of Business Analytics — ASE Bucharest (FABIZ)	Romania	✓	€4,500	Romanian government scheme (non-EU eligible)	Recency cliff: non-EU applicants must have graduated 2023 or later. A mid-2027 graduate is fine; a gap year is not.
8	Advanced Analytics — Big Data — SGH Warsaw	Poland	✓	€4,800	Banach NAWA: tuition-free + PLN 2,500/mo	Banach names Tunisia explicitly. Deadline runs ahead of the university's. Strongest cost-to-quality ratio in the list.
9	Economic Data Analysis — Prague University of Economics (VŠE)	Czechia	✓	€5,000	Czech govt scheme excludes Tunisia	No national funding route — this one is self-funded or institutional only. Accepts a bachelor in any field.
10	Data Science and Business Analytics — University of Warsaw	Poland	✓	€4,900	Banach NAWA	Same Banach advantage as #8. Verify the faculty hosting, which affects whether it reads as business-hosted.
11	MSc in Marketing Analytics — AUEB Athens	Greece	⚠ 75 ECTS	€4,800 total	€4,800 total	Requires C2 English — the highest language bar in the dataset, and the binding constraint here, not the fee. Exact-title Track A match.
12	Business Informatics — Ljubljana School of Economics	Slovenia	✓	€4,700	—	Ljubljana states in writing that 180 ECTS suffices — one of the few explicit confirmations found anywhere.
13	Master's degree, Data Science — Technical University of Moldova	Moldova	✓	€3,000	—	ANACEC programme-level accreditation was not opened. Confirm before applying — this is exactly the check the Cypriot lapses show matters.
14	NOVA IMS Data Science and Advanced Analytics	Portugal	✓	€5,300	—	Strong technical fit. Portugal's post-study work rules are unverified across all 8 Portuguese rows.
15	Master in Business Analytics & AI — EBS Universität	Germany	✓	€33,780 total	–€3,000 if enrolled by 28 Feb	States an explicit 180-ECTS-in-any-field floor , rare in Germany. But GMAT/GRE required and IELTS 7.0. Cost is the objection.

If you only do three things in Track A: apply to DEAI and two other Erasmus Mundus consortia (parallel applications, one deadline window), apply to SGH Warsaw with a Banach NAWA application alongside it, and ask Geneva and Cologne the 180-ECTS question by email before spending effort on either.

TRACK B — Digital Media / Media Production

Read this first. Of every Track B programme examined across the whole operation, the overwhelming majority require a **prior degree in media, film or fine art** — Konstfack and Stockholm University of the Arts want a BFA, Kristiania wants 80 ECTS in-field, Volda 90 ECTS plus practical courses, Xamk adds two years of industry work, Le Fresnoy wants bac+5. **A Business Intelligence licence with a videography practice does not satisfy any of them.** The list below is built almost entirely from the exceptions: technology-hosted media programmes, and the two routes that admit on portfolio or on evidence you can actually produce.

#	Programme	Country	2yr	Tuition/yr	After funding	The specific risk
1	RESOUND — sound design for media arts (Erasmus Mundus: IADT, Lusófona, LMTA)	IE/PT/LT	✓	€0 with EMJM	€0 + €1,400/mo	Directly hits the music-production practice. Portfolio expected. Consortium deadline ~January, a year ahead.
2	FilmMemory (Erasmus Mundus: LUCA, Lusófona, IADT, Tallinn BFM)	BE/PT/IE/EE	✓	€0 with EMJM	€0 + €1,400/mo	Offers a data-analytics project as one of three entry assignments — uniquely lets a BI graduate enter a film master on their own evidence. The single best-fit Track B row found.
3	M.A. Film, Television and Digital Narratives — SRH University Berlin	Germany	✓	€11,543	Institutional awards unverified	The only Track B programme found anywhere that admits on portfolio rather than a prior media degree. Needs 5–8 finished pieces — start now, it takes 2–4 months.
4	Digital Media - Computational Intelligence — Aristotle University	Greece	⚠ 90 ECTS	€1,800 total	€1,800 total	Cheapest qualifying Track B anywhere, and delivered in person (matters for equivalence). But it wants a CS/engineering/numerate-science degree — the BI licence is a real risk here.
5	MA Design, Major Interaction Design — ZHdK Zurich	Switzerland	✓	€2,440	—	Confirmed English-taught. Portfolio required. Design rather than production — closer to your analytics side than your camera side.
6	Digital Media (Media Informatics) — University of Bremen	Germany	✓	€0	€0	Accepts a 3-year bachelor and only 150 ECTS. Informatics-hosted, so the BI background is an asset. Portfolio required.
7	Interaction Design MA — Estonian Academy of Arts	Estonia	✓	€4,200	—	Estonia accepts a bachelor in any field. Portfolio required, but interaction design portfolios can be built from data-visualisation and video work.
8	Creative Intelligence & Technology — Leiden University	Netherlands	✓	€22,500	—	Markets itself as open to any prior bachelor field — rare in Track B. Cost is the objection, and no Dutch national scheme covers it.
9	Master Création numérique, parcours Arts et Technologies — Paris 8	France	✓	€3,950	Eiffel €1,200/mo	French-taught, which suits you. Campus France «Études en France» is a mandatory gate opening ~October. Portfolio required.
10	Documentary Film — Tallinn University (BFM)	Estonia	✓	€4,600	—	English-taught, accepts any bachelor. Portfolio required. BFM is a genuine production school, not a studies department.

#	Programme	Country	2yr	Tuition/yr	After funding	The specific risk
11	DocNomadsPlus (Erasmus Mundus, documentary)	multi	✓	€0 with EMJM	€0 + €1,400/mo	Only Track B row with a published forward calendar : call opens Nov 2026, scholarship deadline January 2027. Heavy portfolio expectations.
12	Serial Storytelling (International Track) — ifs Köln	Germany	✓	€7,500	—	Accepts a 3-year bachelor, English-taught, writing-led rather than portfolio-led — a different entry route to test.
13	Master en Media Design — HEAD Genève	Switzerland	✓	€2,408	—	Very low fee for Switzerland; living costs dominate. <code>accepts_3yr_bachelor</code> unpublished — ask.
14	RE_PLAY (Erasmus Mundus, games: Lusófona, LUCA, Aalto)	PT/BE/FI	✓	€0 with EMJM	€0 + €1,400/mo	Next call opens October 2026. Games rather than film — worth considering if the technical side appeals more than the camera.
15	Master Cinéma et audiovisuel (Réalisation/Production/Image/Son/VFX) — ENSAV Toulouse	France	✓	€250	Eiffel	Cheapest non-zero row in the dataset. French-taught. A public film school, so competition is severe and a portfolio is effectively required.

If you only do three things in Track B: apply to FilmMemory (the data-analytics entry assignment is a genuine door), start the SRH Berlin portfolio now because it is the one portfolio-admitted route and it takes months, and apply to Bremen because it costs nothing and its informatics hosting makes your BI degree an advantage rather than a mismatch.

What this list is not

It is not ranked by employability, salary or reputation — none of those were in the brief and none were verified, so including them would be invention.

It excludes everything the level filter caught: MBAs, *máster propio*, *Mastère Spécialisé*, Italian *Master di primo livello*, continuing-education programmes, and the four Cypriot programmes whose accreditation has lapsed. It excludes Vlerick, whose degrees are real but open only to people who already hold a master's.

Costs are **tuition only**. Living costs in Switzerland, Ireland and the Nordics will exceed tuition several times over; in Greece, Poland, Romania and Moldova they will not. That inversion matters more than the tuition column and is not visible in it.
